PROJECTS

Reinforcement Learning Algorithm Comparison - Taxi-v4 and Webots Navigation

GitHub: github.com/Zeiny213/reinforcement-learning-taxi-webots

- Implemented Q-learning, SARSA, and First-Visit Monte Carlo agents from scratch using Python and NumPy.
- Trained and evaluated agents on Gymnasium Taxi-v4, comparing success rate, reward, steps, and training time.
- Built configurable training and evaluation scripts with YAML configuration, telemetry logging, visualization, Webots navigation experiments, and tests.

Patient-Aware Mammography Classification - Data Integrity Audit

GitHub: github.com/Zeiny213/patient-aware-mammography-classification

- Audited 56,962 mammography images and identified patient overlap plus 742 byte-identical cross-split image groups with conflicting labels.
- Implemented fail-closed duplicate validation, deterministic patient-grouped splitting, shared preprocessing, model-input checks, and 11 lightweight tests.
- Repaired CNN and EfficientNetB0 training and inference code; documented missing evaluation evidence and excluded data and unverified weights from Git.
